GENERAL DESCRIPTION

The Clair Brothers 12AM is the monitor of choice for the world's top entertainers. This portable, low-profile, high output stage monitoring speaker delivers incredible SPL, exceptional vocal reproduction, and unprecedented low frequency reproduction from a small enclosure. Designed for bi-amplification and custom processing (utilizing Clair Brothers amplification and processing), the 12AM is in a class by itself. No other product can duplicate its combination of performance, size and packaging.

The high frequency compression driver features a 2" throat diameter (4" voice coil diameter), a pure titanium diaphragm, and a neodymium magnet assembly. The driver is joined to proprietary asymmetrical horn for exceptional intelligibility. A custom 12" cone transducer provides mid-bass and low frequency reproduction. The combination of our professional high-output components deliver exceptional performance and unique directional characteristics.

Dual rear mounted EP-4 connectors (both male) allow the use of multiple cabinets from a single

amplifier. Low profile styling and flush mounted side handles provides great aesthetic appeal and portability. The speaker grille is constructed of high grade 14 gauge perforated steel and is specially treated to create a durable exterior finish.

Clair Brothers combines amplification, and proprietary DSP processing in portable racks for all monitor systems. Custom cabling for systems is available and can be pre-wired, labeled and delivered in road cases.

As with all Clair Brothers products, the cabinet is constructed of the finest Baltic birch and finished with a rugged exterior epoxy to withstand the most demanding conditions.

ARCHITECT AND ENGINEER SPECIFICATIONS

The loudspeaker shall be a two-way active system featuring a total of two drivers. The low frequency module contains one 12 in. driver capable of handling 300 watts of pink noise with a 6 dB crest factor for 8 hours (as per EIA RS-426-A standard). The high frequency model contains a 2 in. exit, 4 in. voice coil diameter compression driver joined to a proprietary asymmetrical horn. The 2 in. driver is capable of handling 150 watts (1 kHz to 10 kHz) of pink noise with a 6 dB crest factor for two hours (as per AES-1984 and ANSI S4.26-1984 standards). The signal processing is Clair Brothers proprietary data. The enclosure shall be constructed of 18mm, 13-ply Baltic birch and covered with a durable black epoxy mastic finish. The dimensions shall be 13.94 in. high, 22.43 in. wide, and 18.00 in. deep. The system weight shall be 68 lbs. (30.8kg). The loudspeaker shall be the Clair Brothers 12AM.
